

Post doc position “Variational methods and applications”

Brief instructions to apply

Description. A one-year Post Doc position (with possible extension to a second year), is available at Mathematics Department of University of Rome ”Sapienza”. The expected starting date is September 2012 (with some flexibility). The net salary will be about 1.700 euros per month.

The research topics include variational methods for material science, phase transitions, Riemannian geometry and large deviation approach to non equilibrium systems.

How to apply. You have to download the official call

<http://www.mat.uniroma1.it/bandi/assegni-di-ricerca/ARCHIVIO/2011/bando6.pdf>.

Print the “form A”, fill it and sign it. Notice that the form A is in Italian; you will find some instructions in English at

<http://www.mat.uniroma1.it/people/ponsiglione/Home.html>.

Candidates should send the following **pdf files**

- The form A filled and signed.
- Research project.
- Certificate of your degree (signed) .
- Other titles you want to declare (signed).
- CV (signed).
- Scientific publications.
- A signed copy of your ID document.

All the pdf files listed above together with the application “form A” must be collected in a unique zipped folder (if less than 15 Mb, otherwise split it in more than one folder), and send to assegni@mat.uniroma1.it **before February 29**.
